

Committed to Quality

PXGEO is committed to achieving high quality in every aspect of our business and ultimately in the performance of marine geophysical services and the delivery of seismic product to our clients.

By embedding processes and methods into our Company Management System which support us to work in a safe, environmentally aware and efficient manner, we satisfy our stakeholders' requirements and expectations as well as our own business objectives. This commitment enables us to deliver high quality services and products consistently.

PXGEO promotes an understanding of quality through personal and professional development, and training of our personnel in an ever-changing business environment.

Our commitment to quality underpins the Company's Core Values: to be Responsible, Innovative and Excellent in all that we do, and we recognise our employees for implementing our Core Values in their work.

We seek to improve the quality of our services and products continuously to create value and ensure our clients' expectations are always satisfied or exceeded. We measure our performance regularly against stakeholder expectations, including periodic audit of the PXGEO Management System by our clients, and we review our strategies and goals annually in order to set standards that keep us focused on delivering our commitment to quality.

The Company also systematically conducts audits and management reviews of internal departments and suppliers to ensure that PXGEO continues to deliver high quality services effectively and efficiently.
